

Dear FCC,I am very disappointed that any type of government action would or could be used against Satellite Radio and Satellite services. This valuable service and technology should be readily available to the consumer without restriction with the exception of illegal activites.

Satellite Radio offers a service and quality that is not available through other broadcast mediums.

I respectfully and strongly urge that NAB's petition, 04-160 is rejected and Satellite Radio can continue providing consumers a choice.

Sincerely, Amy Bickle
